

Kelompok SCAM

1. 20312001 Dany Eka Saputra (frontend)
2. 20312013 Pratama Budi Rusadi (frontend)
3. 20312016 Rifan Abiyoga (backend)

Tugas Akhir Sesi 3

Admin

Controler admin “Dashboard_admin”

```
1  <?php
2
3  class Dashboard_admin extends CI_Controller{
4      //membuat agar tidak dapat masuk menggunakan url
5      public function __construct(){
6          parent::__construct();
7
8          if($this->session->userdata('role_id') != '1'){
9              $this->session->set_flashdata('pesan','<div class="alert alert-danger alert-dismissible fade show" role="alert">
10                 Anda Belum Login !
11                 <button type="button" class="close" data-dismiss="alert" aria-label="Close">
12                     <span aria-hidden="true">&times;</span>
13                 </button>
14             </div>');
15             redirect('auth/login');
16         }
17     }
18
19     public function index()
20     {
21         $this->load->view('templates_admin/header');
22         $this->load->view('templates_admin/sidebar');
23         $this->load->view('admin/dashboard');
24         $this->load->view('templates_admin/footer');
25     }
26 }
```

Membuat Public function_construct

Jika userdata != 1 maka ada alert anda belum login, akan di redirect ke ('auth/login') diharuskan login terlebih dahulu.

Membuat function index

Berfungsi untuk memanggil view admin dari header,sidebar,dashboard,dan footer

Controler “admin data_barang”

```
1 <?php
2
3 class Data_barang extends CI_Controller{
4     //membuat agar tidak dapat masuk menggunakan url
5     public function __construct(){
6         parent::__construct();
7
8         if($this->session->userdata('role_id') != '1'){
9             $this->session->set_flashdata('pesan','<div class="alert alert-danger alert-dismissible fade show" role="alert">
10                 Anda Belum Login !
11                 <button type="button" class="close" data-dismiss="alert" aria-label="Close">
12                     <span aria-hidden="true">&times;</span></button>
13             </div>');
14             redirect('auth/login');
15         }
16     }
17
18     public function index()
19     {
20         $data['barang'] = $this->model_barang->tampil_data()->result();
21         $this->load->view('templates_admin/header');
22         $this->load->view('templates_admin/sidebar');
23         $this->load->view('admin/Data_barang',$data);
24         $this->load->view('templates_admin/footer');
25     }
26 }
```

Membuat Public function_construct

Jika userdata != 1 maka ada alert anda belum login, akan di redirect ke ('auth/login') diharuskan login terlebih dahulu.

Membuat function index

Berfungsi untuk memanggil view admin dari header,sidebar,dashboard,dan footer

```

28 public function tambah_aksi()
29 {
30     $nama_brg = $this->input->post('nama_brg');
31     $keterangan = $this->input->post('keterangan');
32     $kategori = $this->input->post('kategori');
33     $harga = $this->input->post('harga');
34     $stok = $this->input->post('stok');
35     $gambar = $FILES['gambar']['name'];
36     if ($gambar=''){}else{
37         $config ['upload_path'] = './uploads';
38         $config ['allowed_types'] = 'jpg|jpeg|png';
39
40         $this->load->library('upload', $config);
41         if(!$this->upload->do_upload('gambar')){
42             echo "Gambar Gagal Diupload";
43         }else{
44             $gambar=$this->upload->data('file_name');
45         }
46     }
47
48     $data = array (
49         'nama_brg' => $nama_brg,
50         'keterangan' => $keterangan,
51         'kategori' => $kategori,
52         'harga' => $harga,
53         'stok' => $stok,
54         'gambar' => $gambar,
55     );
56
57     $this->model_barang->tambah_barang($data,'tb_barang');
58     redirect('admin/data_barang/index');
59 }
60
61
62 public function edit($id)
63 {
64     $where = array ('id_brg' => $id);
65     $data['barang'] = $this->model_barang->edit_barang($where,
66         'tb_barang')->result();
67     $this->load->view('templates_admin/header');
68     $this->load->view('templates_admin/sidebar');
69     $this->load->view('admin/edit_barang',$data);
70     $this->load->view('templates_admin/footer');
71 }

```

Membuat function tambah_aksi

Agar tombol di aksi dapat berfungsi

Membuat function edit

Agar button edit bsia digunakan untuk mengubah di database

```

73 |
74 | public function update()
75 | {
76 |     $id          = $this->input->post('id_brg');
77 |     $nama_brg    = $this->input->post('nama_brg');
78 |     $keterangan  = $this->input->post('keterangan');
79 |     $kategori     = $this->input->post('kategori');
80 |     $harga       = $this->input->post('harga');
81 |     $stok        = $this->input->post('stok');
82 |
83 |     $data = array(
84 |         'nama_brg'      => $nama_brg,
85 |         'keterangan'    => $keterangan,
86 |         'kategori'      => $kategori,
87 |         'harga'         => $harga,
88 |         'stok'          => $stok,
89 |     );
90 |
91 |     $where = array(
92 |         'id_brg' => $id
93 |     );
94 |
95 |     $this->model_barang->update_data($where,$data,'tb_barang');
96 |     redirect('admin/data_barang/index');
97 | }
98 |
99 | public function hapus ($id)
100 | {
101 |     $where = array('id_brg' => $id);
102 |     $this->model_barang->hapus_data($where,'tb_barang');
103 |     redirect('admin/data_barang/index');
104 | }
105 |

```

Membuat function Update

Agar button update dapat digunakan untuk update di database

Membuat function Hapus

Agar button hapus dapat menghapus barang dari data base

Controler “admin invoice”

```
1 <?php
2
3 class Invoice extends CI_Controller{
4     //membuat agar tidak dapat masuk menggunakan url
5     public function __construct(){
6         parent::__construct();
7
8         if($this->session->userdata('role_id') != '1'){
9             $this->session->set_flashdata('pesan','<div class="alert alert-danger alert-dismissible fade show" role="alert">
10                 Anda Belum Login !
11                 <button type="button" class="close" data-dismiss="alert" aria-label="Close">
12                     <span aria-hidden="true">&times;</span></button>
13             </div>');
14             redirect('auth/login');
15         }
16     }
17 }
18
19
20 public function index()
21 {
22     $data['invoice'] = $this->model_invoice->tampil_data();
23     $this->load->view('templates_admin/header');
24     $this->load->view('templates_admin/sidebar');
25     $this->load->view('admin/invoice',$data);
26     $this->load->view('templates_admin/footer');
27 }
28
29
30 public function detail($id_invoice)
31 {
32     $data['invoice'] = $this->model_invoice->ambil_id_invoice($id_invoice);
33     $data['pesanan'] = $this->model_invoice->ambil_id_pesanan($id_invoice);
34     $this->load->view('templates_admin/header');
35     $this->load->view('templates_admin/sidebar');
36     $this->load->view('admin/detail_invoice', $data);
37     $this->load->view('templates_admin/footer');
38 }
39 }
```

Membuat Public function__construct

Jika userdata != 1 maka ada alert anda belum login, akan di redirect ke ('auth/login') diharuskan login terlebih dahulu.

Membuat function Construct

Membuat function Index

Berfungsi untuk memanggil view admin dari header,sidebar,dashboard,dan footer

Membuat function detail

Berfungsi untuk memanggil detail

Views “Admin → dashboard”

```
application > views > admin > dashboard.php > div.container-fluid > div.row
1 <div class="container-fluid">
2
3     <!-- Content Row -->
4     <div class="row">
5
6     <!-- Content Row -->
7 </div>
```

Menggunakan css dari bootstrap

Views “Admin → data_barang”

```
1 <div class="container-fluid">
2     <button class="btn btn-sm btn-primary mb-3" data-toggle="modal" data-target="#tambah_barang"><i class="fas fa-plus fa-sm"></i> Tambah Barang</button>
3
4     <table class="table table-bordered">
5         <tr>
6             <th>NO</th>
7             <th>NAMA BARANG</th>
8             <th>KETERANGAN</th>
9             <th>KATEGORI</th>
10            <th>HARGA</th>
11            <th>STOCK</th>
12            <th colspan="3">AKSI</th>
13        </tr>
14
15        <?php
16        $no=1;
17        foreach ($barang as $brg) : >
18
19            <tr>
20                <td><?= $no++ ?></td>
21                <td><?= $brg->nama_brg ?></td>
22                <td><?= $brg->keterangan ?></td>
23                <td><?= $brg->kategori ?></td>
24                <td><?= $brg->harga ?></td>
25                <td><?= $brg->stok ?></td>
26                <td><div class="btn btn-success btn-sm"><i class="fas fa-search-plus"></i></div></td>
27                <td><?= anchor('admin/data_barang/edit/' . $brg->id_brg,
28                    '<div class="btn btn-primary btn-sm"><i class="fas fa-edit"></i></div>') ?></td>
29                <td><?= anchor('admin/data_barang/hapus/' . $brg->id_brg,
30                    '<div class="btn btn-danger btn-sm"><i class="fas fa-trash"></i></div>') ?></td>
31            </tr>
32
33            <?php
34            endforeach;
35        >
36
37    </table>
38 </div>
39
```

Membuat table border menggunakan css, dan melakukan perulangan untuk \$barang as \$brg. Untuk \$no dimulai dari 1. Serta menambahkan button succes.

```

<!-- Modal -->
<div class="modal fade" id="tambah_barang" tabindex="-1" role="dialog" aria-labelledby="exampleModallabel" aria-hidden="true">
  <div class="modal-dialog" role="document">
    <div class="modal-content">

19        <td><?php echo $inv->tgl_pesan ?></td>
20        <td><?php echo $inv->batas_bayar ?></td>
21        <td><?php echo anchor('admin/invoice/detail/'.$inv->id,
22          '<div class="div btn btn-sm btn-primary">Detail</div>') ?></td>
23      </tr>
24
25      <?php endforeach; ?>
26
27    </table>
28  </div>
```

Berfungsi untuk menampilkan invoice pada database

Templates_admin “footer”

```
application > views > templates > footer.php
1 <!-- Bootstrap core JavaScript-->
2 <script src="<?%= base_url() ?>assets/vendor/jquery/jquery.min.js"></script>
3 <script src="<?%= base_url() ?>assets/vendor/bootstrap/js/bootstrap.bundle.min.js"></script>
4
5 <!-- Core plugin JavaScript-->
6 <script src="<?%= base_url() ?>assets/vendor/jquery-easing/jquery.easing.min.js"></script>
7
8 <!-- Custom scripts for all pages-->
9 <script src="<?%= base_url() ?>assets/js/sb-admin-2.min.js"></script>
10
11 <!-- Page level plugins -->
12 <script src="<?%= base_url() ?>assets/vendor/chart.js/Chart.min.js"></script>
13
14 <!-- Page level custom scripts -->
15 <script src="<?%= base_url() ?>assets/js/demo/chart-area-demo.js"></script>
16 <script src="<?%= base_url() ?>assets/js/demo/chart-pie-demo.js"></script>
17
18 </body>
19
20 </html>
```

Menggunakan bootstrap dari sb_admin 2

Templates “header”

```
application > views > templates > header.php
1  <!DOCTYPE html>
2  <html lang="en">
3
4  <head>
5
6      <meta charset="utf-8">
7      <meta http-equiv="X-UA-Compatible" content="IE=edge">
8      <meta name="viewport" content="width=device-width, initial-scale=1, shrink-to-fit=no">
9      <meta name="description" content="">
10     <meta name="author" content="">
11
12     <title>Dashboard</title>
13
14     <!-- Custom fonts for this template-->
15     <link href="<?= base_url() ?>assets/vendor/fontawesome-free/css/all.min.css" rel="stylesheet" type="text/css">
16     <link
17         href="https://fonts.googleapis.com/css?family=Nunito:200,200i,300,300i,400,400i,600,600i,700,700i,800,800i"
18         rel="stylesheet">
19
20     <!-- Custom styles for this template-->
21     <link href="<?= base_url() ?>assets/css/sb-admin-2.min.css" rel="stylesheet">
22
23 </head>
```

Menggunakan bootstrap sb admin 2, dan memanggil base_url fontawesome.

Controler “Auth”

```
1 <?php
2

42         $this->session->sess_destroy();
43         redirect('auth/login');
44     }
45 }
46 }
```

Membuat function login

Jika login salah akan menampilkan alert dan jika benar akan menampilkan halaman sesuai role_id nya

Membuat function logout

Jika user logout akan di tampilkan di halaman login

Controler “Dashboard”

```
1 <?php
2
3 class Dashboard extends CI_Controller{
4     //membuat agar tidak dapat masuk menggunakan url
5     public function __construct(){
6         parent::__construct();
7
8         if($this->session->userdata('role_id') != '2'){
9             $this->session->set_flashdata('pesan','<div class="alert alert-danger alert-dismissible fade show" role="alert">
10                 Anda Belum Login !
11                 <button type="button" class="close" data-dismiss="alert" aria-label="Close">
12                     <span aria-hidden="true">&times;</span>
13                 </button>
14             </div>');
15             redirect('auth/login');
16         }
17     }
18
19     public function tambah_ke_keranjang($id)
20     {
21         $barang = $this->model_barang->find($id);
22
23         $data = array(
24             'id'      => $barang->id_brg,
25             'qty'     => 1,
26             'price'   => $barang->harga,
27             'name'    => $barang->nama_brg,
28         );
29
30         $this->cart->insert($data);
31         redirect('welcome');
32     }
33
34
35     public function detail_keranjang()
36     {
37         $this->load->view('templates/header');
38         $this->load->view('templates/sidebar');
39         $this->load->view('keranjang');
40         $this->load->view('templates/footer');
41     }
42
43
44
45
46     public function hapus_keranjang()
47     {
48         $this->cart->destroy();
49         redirect('welcome');
50     }
51 }
```

Membuat Public function __construct

Jika userdata != 1 maka ada alert anda belum login, akan di redirect ke ('auth/login') diharuskan login terlebih dahulu.

Membuat function tambah_keranjang

Agar barang dapat di tambahkan ke database

Membuat function detail_keranjang dan hapus keranjang

Agar detail keranjang dan hapus keranjang bisa terhapus

```

44
45
46     public function hapus_keranjang()
47     {
48         $this->cart->destroy();
49         redirect('welcome');
50     }
51
52
53     public function pembayaran()
54     {
55         $this->load->view('templates/header');
56         $this->load->view('templates/sidebar');
57         $this->load->view('pembayaran');
58         $this->load->view('templates/footer');
59     }
60
61
62     public function proses_pesanan()
63     {
64         $is_processed = $this->model_invoice->index();
65         if($is_processed){
66             $this->cart->destroy();
67             $this->load->view('templates/header');
68             $this->load->view('templates/sidebar');
69             $this->load->view('proses_pesanan');
70             $this->load->view('templates/footer');
71         }else{
72             echo "Maaf, Pesanan Anda Gagal diproses! ";
73         }
74     }
75
76     public function detail($id_brg)
77     {
78
79         $data['barang'] = $this->model_barang->detail_brg($id_brg);
80         $this->load->view('templates/header');
81         $this->load->view('templates/sidebar');
82         $this->load->view('detail_barang', $data);
83         $this->load->view('templates/footer');
84     }
85 }

```

Membuat function hapus keranjang

Membuat function pembayaran

Menampilkan tampilan pembayaran

Membuat function proses_pesanan

Menampilkan tampilan proses pesanan dan menampilkan data yang

Membuat function detail

Menampilkan halaman detail dan menampilkan data yang ada di database

Controler “Kategori”

Menampilkan halaman registrasi

Tampilan Aplikasi “Form Login”

The image shows a login form centered on a solid blue background. The form is a white rounded rectangle with a subtle drop shadow. At the top, the word "Login" is centered in a dark grey font. Below it are two input fields: the first is labeled "Masukkan Username Anda" and the second is labeled "Masukkan Password Anda". Both labels are in a small, light grey font. Below the password field is a blue button with the word "Login" in white. At the bottom of the form, there is a link that says "Belum Punya Akun? Daftar!" in a small, light grey font.

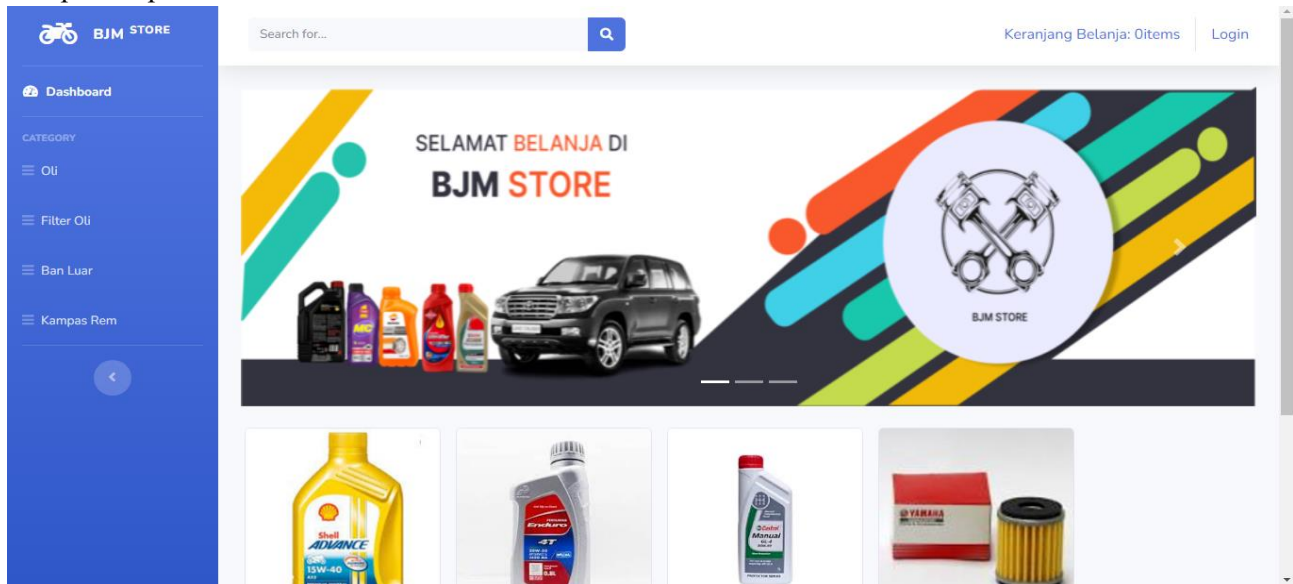

Di sini diharuskan mengisi username dan password, jika belum punya akun maka bisa mengklik Daftar

Tampilan Aplikasi “Registrasi”

The image shows a registration form centered on a solid blue background. The form is a white rounded rectangle with a subtle drop shadow. At the top, the text "Daftar Akun!" is centered in a dark grey font. Below it are four input fields: "Nama Anda", "Username Anda", "Password", and "Ulangi Password". The labels are in a small, light grey font. Below these fields is a blue button with the word "Daftar" in white. At the bottom of the form, there is a link that says "Sudah Punya Akun? Silahkan Login" in a small, light grey font.

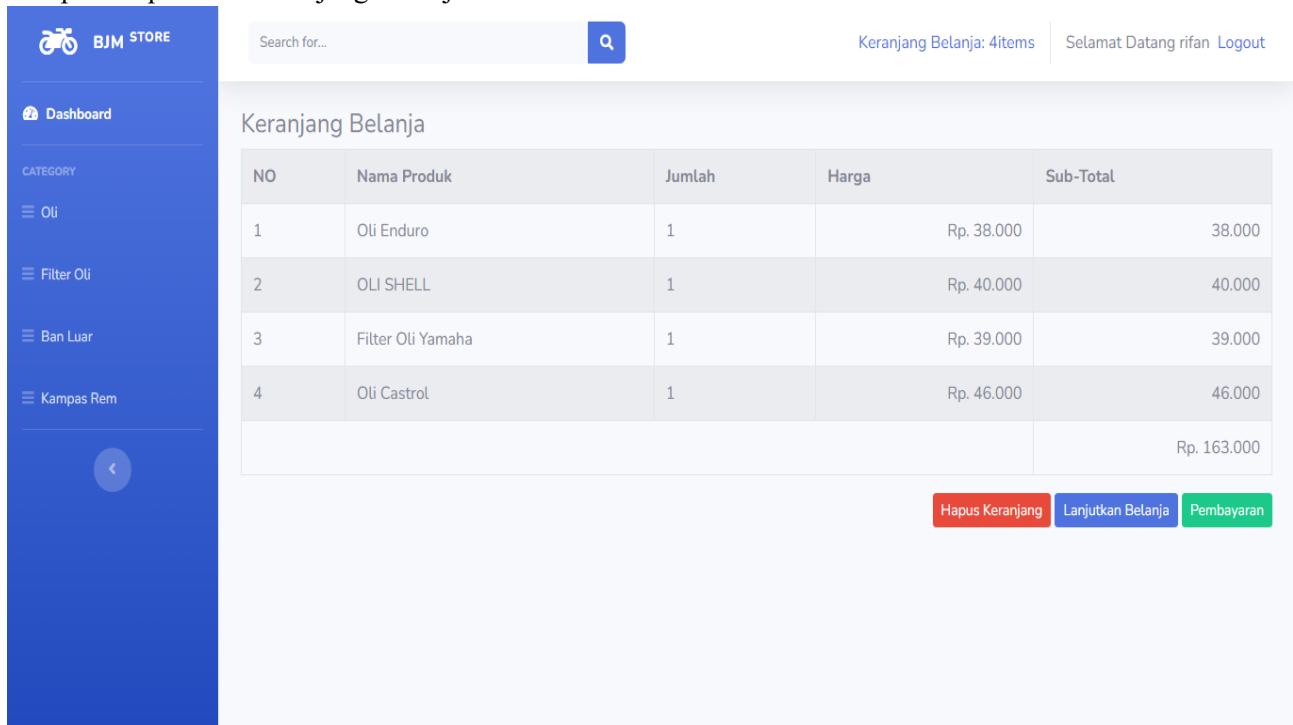

Jika belum mempunyai akun, maka diharuskan registrasi mengisi nama, username, dan password.

Tampilan Aplikasi “Dashboard User”

Di dashboard ini user dapat melihat produk yang dijual sesuai kategori masing-masing.

Tampilan Aplikasi “Keranjang Belanja”

Di tampilan keranjang belanja, user dapat melihat produk apa yang sudah di pesannya, dan juga user dapat melakukan pembatalan pembelian dengan menghapus keranjang, jika ingin menambahkan barang user dapat mengklik tombol lanjutkan belanja. User juga dapat langsung melakukan pembayaran jika tidak ada barang yang ingin dibeli lagi.

Tampilan Aplikasi “Input Alamat Pengiriman dan Pembayaran”

The screenshot shows the 'Input Alamat Pengiriman dan Pembayaran' form in the BJM STORE application. The form is titled 'Input Alamat Pengiriman dan Pembayaran' and includes a green banner at the top stating 'Total Belanja Anda: Rp. 163.000'. The form fields are:

- Nama Lengkap: Input field with placeholder 'Nama Lengkap Anda'.
- Alamat Lengkap: Input field with placeholder 'Alamat Lengkap Anda'.
- No. Telepon: Input field with placeholder 'Nomor Telepon Anda'.
- Jasa Pengiriman: Dropdown menu with 'JNE' selected.
- Pilih Bank: Dropdown menu with 'BCA - XXXXXX' selected.

At the bottom of the form is a blue 'Pesan' button. The left sidebar shows the 'Dashboard' and 'CATEGORY' sections, with 'Oli' selected. The top navigation bar includes a search bar, a shopping cart icon with 'Keranjang Belanja: 4items', and a 'Logout' link.

Disini user diharuskan menginput nama lengkap, alamat, no telpon, jasa pengiriman, dan bank sesuai yang diinginkan.

Tampilan Aplikasi “Dashboard Admin”

The screenshot shows the 'Dashboard Admin' in the BJM STORE application. The dashboard includes a '+ Tambah Barang' button and a table with the following data:

NO	NAMA BARANG	KETERANGAN	KATEGORI	HARGA	STOCK	AKSI
1	OLI SHELL	oli shell	Oli	40000	16	  
2	Oli Enduro	oli enduro	Oli	38000	38	  
3	Oli Castrol	Oli Castrol	Oli	46000	9	  
4	Filter Oli Yamaha	filter oli dari yamaha yang sangat terjamin kualitas nya	Filter Oli	39000	11	  

The left sidebar shows the 'Dashboard', 'Data Barang', and 'Invoice' sections. The top navigation bar includes a search bar, a 'Logout' link, and a 'Selamat Datang admin' message.

Disini admin dapat melakukan penambahan barang dan juga penghapusan barang.

Tampilan Aplikasi “Dashboard Admin”

The screenshot displays the Admin Dashboard interface. On the left is a dark blue sidebar with navigation links: Dashboard, Data Barang, and Invoice. The main content area has a search bar and a '+ Tambah Barang' button. A modal titled 'Form Input Produk' is open in the center, containing input fields for Nama Barang, Keterangan, Kategori (a dropdown menu with 'Oli' selected), Harga, and Stock. It also features a 'Gambar Produk' section with a 'Choose File' button and the text 'No file chosen'. At the bottom of the modal are 'Close' and 'Simpan' buttons. In the background, a table lists existing products with columns for NO, NAMA BARANG, KATEGORI, HARGA, STOCK, and AKSI.

NO	NAMA BARANG	KATEGORI	HARGA	STOCK	AKSI
1	OLI SHELL		40000	16	[Icons]
2	Oli Enduro		38000	38	[Icons]
3	Oli Castrol		46000	9	[Icons]
4	Filter Oli Yamaha		39000	11	[Icons]

Admin dapat menambahkan barang dengan menginputkan nama barang, keterangan barang, kategorinya, harga serta stock. Dan juga dapat memasukan gambar dari barang tersebut.
